

REICA  
Metal makes sense

# Brand

Safeguarding the spirit of the founder in terms of innovation, Gilles Romaine relies on integrity, humanism and high-standard quality.

‘The REICA range reflects a radically new warm approach to steel furniture design and construction.’

Gilles Romaine, Managing Director of Romaine Group, succeeded to his father, Pierre Romaine, who founded Romaine SAS, the industrial sheet metal work company on the European market. The Group is ISO9001 certified and covers a wide range of sectors such as vehicles (trucks, buses, fire trucks..), electronic payment devices, but also installations for the chemical, oil and food industries. Romaine SAS employs 90 persons, workshop covers over 8,500 square meters and an average of 150 tons of materials steel are processed every month.

# Know-how

‘ Our solid experience in the fields of laser cutting, forming, assembly, painting and finishing helps us to bring the REICA range at this high level of quality requirements and creativity. ’

REICA, a French manufacturer of home furniture, relies on an efficient industrial base to create products fashioned by the eye of the designer and shaped by the hands of the technician.

# The 'Pierre' Range

It first pays tribute to Pierre Romaine, the Founder of the ROMAIRE SAS.

“Revealing this collection we intend to underline our innovative, creative and pioneering spirit.”

It is also a tribute to the work of Pierre SOULAGES. He is worldwide known for his monochrome painting where only the textures and states of surfaces create light and color. He combines various movements and textures together. No extra unnecessary effects but a sensitive expression. This collection aims at revealing different aspects of metal playing with textures and lights. Through this monochrome color a variety of perceptions and sensations express themselves.
